

CEYLAN

SOLUTIONS FOR THE FOOD INDUSTRY

1 Experience

More than 50 years of experience in research, manufacturing and commercialization of food formulations, flavorings and additives for meat industry and precooked .

Ceylan has always been committed to our clients' satisfaction, offering high quality services by the best and foremost technical team. We have always focused on innovation and development as well as on the creation of new national and international favours, which has allowed us to be pioneers in new tastes and trends.

2 Production

At Ceylan we have always believed that the most modern infrastructures, the latest technologies and the most efficient processes are crucial in order to provide added value to our clients.

But we know this is not enough. Our team of professionals, who receive ongoing training, is one of our most important assets. They are the ones who make a difference and offer the best service in each department.

More than 25,000 m²
for the manufacture
of our products.

3 What we do

We have developed our own know-how for manufacturing and marketing a wide range of products and solutions for the food industry. This has allowed us to constantly develop innovative products and offer tailored services to each of our clients.

Ceylan is 100% actively involved in the:

- Development of recipes and flavours
- Product development
- Innovation and improvement in product performance
- Tailored solutions and developments
- Support both before and after the creation of a product

With the aid of our pilot plant and our technical team, we are able to offer you:

- Constant monitoring from the creation of the idea to its manufacturing.
- Product testing and development carried out at our pilot plant.
- Constant legislative support.

4 Security

We have been awarded the IFS (International Food Standard) and BRC (British Retail Consortium) standards, and all our products are adapted to the strictest law requirements on both a national and international level.

5 Quality

For us, quality is not only a goal but also our philosophy.

Our laboratories are equipped with scientific instruments for conducting analytical quality controls, in accordance with legislative requirements and technological requirements.

All this allows us to make chemical, physical and microbiological studies of each and every one of our products.

6 Technical support

In Ceylan the most essential are our customers. We advise them and help them carry out their projects and products.

This is possible because we have modern facilities where you can find from a semi-industrial plant for the manufacture of meat products manufacturing plant, to an experimental kitchen for developing precooked dishes. All equipped with the most modern for the application of the latest manufacturing technology equipment.

7 Innovation

In these times of research and development of new products, Ceylan always goes to the head and we have a broad technical and human resources for the development and innovation in its R + D + I constantly evolving.

We also collaborate with the most prestigious research centers in the world.
